

Cut protection glove, level F

4X43F

X1XXXX

EU type examination certificate under regulation no 0075/057/162/02/21/0262 EXT 03/07/25
issued by the CTC, notified body no. 0075.

Composition

METALSKIN is designed to offer high-performance protection while ensuring comfort and precision in demanding work environments.

100% high density black polyethylene filament and metallic filament:

Combines abrasion and cut resistance with optimal flexibility, even in the most delicate tasks.

100% black textured polyamide thread:

Provides increased strength and protection against risks in the engineering industry, while ensuring lightness and mobility.

Black CleanPu® coating:

The coating on the palm and fingertips provides excellent grip and increased resistance to wear, improving durability and safety when handling slippery or abrasive objects.

100% carbon thread insert:

Located at the tip of the thumb and index finger, this thread allows compatibility with touch screens, making it an ideal glove for tasks requiring the use of electronic devices while maintaining maximum protection.

Coated reinforcement between thumb and index finger:

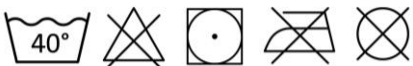

To improve resistance and durability, additional reinforcement is placed between these two fingers, areas that are often stressed during manual work.

8cm elasticated wrist:

Ensures a perfect fit and secure hold, keeping the glove in place throughout the working day, while preventing dust or debris from entering.

METALSKIN is specially designed for environments requiring both high protection against risks in the engineering industry and the ability to work with tools or touch screens.

Cleaning

Sizes

5 – 6 – 7 – 8 – 9 – 10 – 11 – 12

Packaging

Bag of 10 – Box of 50

Fully compatible with
touch screens

Reinforced thumb fold
for a good grip and
increased resistance in
the area

Optimal grip for excellent
handling of components

Increased
comfort
for prolonged
wear
without
discomfort.

Product benefits

Enhanced durability

Thanks to a **strategic patch** between the thumb and index finger, these gloves offer **increased protection** against premature wear, extending their service life even with **intensive use**.

The black **Clean PU®** coating provides exceptional **resistance** to repeated rubbing, ensuring **long-lasting performance** in **demanding environments**.

Abrasion resistance

Versatile

Designed for **various industries**, these protective gloves combine **resistance and comfort**. They meet the needs of professionals who require **durable protection** without compromising **freedom of movement**.

The **flexible Clean PU®** coating maintains **excellent** finger **mobility**, providing **good** tactile **sensitivity** and **easy handling** of even the most delicate objects.

Dexterity and precision

Optimal comfort

Designed to **fit the hand perfectly**, these protective gloves ensure an **ergonomic adjustment**, reducing fatigue and allowing **prolonged wear without discomfort**.
