Quantities per

10

Quantities per

200

Activities sectors

Automotive industry, Assembly works, Rubber manufacturing, Metal manufacturing, Plastics manufacturing, Glass manufacturing

CAT II

EN ISO 21420

EN 388

4 3 4 3 B

The POWERSKIN glove is designed to offer lightweight, flexible protection while maintaining maximum performance in working environments where precision and comfort are essential.

Ultra-lightweight seamless 13 gauge knitted: Made from 100% high density polyethylene filament, this glove provides excellent protection against light cuts, while remaining extremely flexible and lightweight. The absence of seams improves comfort and reduces the risk of irritation.

Black Clean PU® coating on palm and fingertips: Clean PU® coating ensures optimum grip and excellent durability while protecting against moisture and wear. This technology also ensures a precise grip in work environments where dexterity is essential.

Tactile thumb and forefinger: The thumb and forefinger areas are specially designed to be compatible with touch screens, allowing smooth use of mobile devices or other technologies without removing the glove.

Coated reinforcement between thumb and forefinger: To improve resistance and durability, an additional reinforcement has been placed between these two fingers, areas that are often used during manual work.

The POWERSKIN glove is ideal for sectors that require lightweight comfort and dexterity, such as logistics, electronic assembly works and maintenance, as well as handling tasks where precise contact with surfaces or touch screens is required.

Certifications

A healthy coating for the operator's hands.

Compatible with touchscreen devices
